

Yuki Nakamura

AI-Powered Full-Stack & Mobile Developer

 nyuki6589@gmail.com  Akashi, Hyogo, Japan  yuki1221.netlify.app  github.com/yukinakamura1221

Summary

Frontend-focused developer with professional experience building responsive, production web and mobile applications in React, React Native, and Angular. Comfortable across the full stack — Node.js, PHP, MySQL — and experienced integrating REST APIs and JSON data into clean, component-based UIs. Based in Japan; available for remote work with UK/US teams and open to relocation-flexible contract or full-time roles.

Experience

Frontend / Web Developer, Contract / Freelance

01/2023 – 12/2025

- Built and shipped responsive React applications used across desktop, tablet, and mobile breakpoints, focusing on reusable component architecture.
- Integrated frontend applications with REST APIs and backend services, handling dynamic JSON data and client-side state management.
- Reduced recurring UI bugs by refactoring shared components into a single reusable library, cutting duplicate code across screens.
- Worked across React, Angular, Node.js, PHP, SQL, and MySQL, adapting to each project's existing stack rather than a single fixed toolchain.
- Applied accessibility and cross-browser compatibility standards to production interfaces, reducing post-release UI fixes.
- Developed working knowledge of React Native for cross-platform mobile builds, extending frontend skills into mobile delivery.

Education

B.Sc. Computer Science, Tokyo Institute of Technology

2023

Technical Skills

AI & Intelligent Applications

- AI-Powered Applications
- AI API Integration
- AI-Assisted Development
- AI-Driven UI & Features
- AI Application Architecture

Mobile

- React Native
- Android Studio
- Responsive Mobile UI

Frontend

- HTML5
- CSS3
- JavaScript (ES6+)
- jQuery
- TypeScript
- React
- Angular
- Responsive & Accessible UI

Database

- MySQL & PostgreSQL & MongoDB

Backend

- Node.js
- Python
- PHP
- C#
- C++

Languages

Japanese

Native

English

Conversational / Working Proficiency

Availability

Open to

Full-Time · Contract · Freelance · Remote · International Opportunities

Target Roles

AI-Powered Full-Stack Developer · Mobile Developer · Frontend Developer · React Developer

Strengths

- Clean, maintainable code
- API integration
- Cross-platform development
- Fast adaptation to new stacks
- Component-based architecture
- Debugging & problem-solving
- Clear communication
